BIT HOLDER WRENCH HEAD FOR TBIH & TBX-12 BREAK-OVER WRENCHES

- The bit holder provides a stable interface for interchangeable insert and power bits.
- The modular design supports multiple bit changes without performance degradation.
- The head ensures precision and accuracy applied from the torque wrench
- Durable 17-4 PH Stainless Steel
- New design is available for the TBIH, TBX-12 and TBX-12 ESD wrenches

Model	Item #	Max Torque Capacity
Bit Holder Head - 1/4 F/Hex	069317	12 N.m (106 lbf.in)
Bit Holder Head - 4mm	069323	5.65 N.m (50 lbf.in)

Note: A bit is inserted into a Bilt holder via a press-fitting process. The bit is secured within the Bit Holder by using a retaining compound and requires controlled removal and installation, special tooling and process controls are required. Mountz recommends that bit replacement be performed by our service team or a qualified technician.
